

## THE TRIPLE GODDESS NUMBER ALCHEMY

**Numbers have been used throughout history as a tool for divination, inner meaning and for identifying the patterns and purpose to human existence.**

Numbers have a vibration, a unique frequency and energy, where universal principles are represented in stages, cycles from 1-9, symbolic of the stages of life, the beginning of an idea to its manifestation: birth, life, and death/rebirth.

Every word and letter vibrate to a number frequency, each with a special and unique energy.

Numbers can therefore give insight into aspects of self, personality, individuality, patterns and fate, and how to use and work these aspects in your daily life. e.g. if you have four 1's in your numbers you are probably quite strong-willed/independent and this can be worked in the positive and negative – showing up as drive and determination in the positive and maybe in the negative an unwillingness to be flexible and bullying – how do you work with your numerological gifts?

**Number 1** ~ self, originality, raw energy, initiative, aggressive, will, dominant, new beginnings or the start of a cycle, leader, pioneer, the first (Sun - Yang - Masculine)

**Number 2** ~ duality, balance, cooperation, the pair/partnership, changeable, cautious, indecisive, peacemaker, harmony, union (Moon - Yin - Feminine)
